Harbin Ice and Snow Sculpture Festival is one of the biggest winter festivals in the world. It takes place every year in Harbin, a city in northeastern China. The festival usually starts in January and continues for about a month. During the festival, artists from all around the world come to Harbin to create huge ice and snow sculptures. These sculptures include castles, animals, famous buildings and even people. At night, the sculptures are lit up with colorful lights, which make them look magical. The weather is very cold, sometimes below minus 20 degrees Celsius, so visitors wear warm clothes. People can also enjoy fun winter activities like ice skating, sledding and snowball fights. Harbin Festival is not just about art — it's also about enjoying winter and sharing the experience with others.

Computers have changed a lot since they were first invented. In the beginning, they were very large and slow. They were only used by scientists and took up an entire room. In the 1980s, personal computers became smaller and more popular. People started using them at home and in schools. Computers have made things easier as they are used everywhere. Modern computers are faster, lighter, and more helpful than ever. They help us work, learn, and connect with others every day.
