CLASS: 12 /
SCHOOL NUMBER:

1. Listen to the paragraph and fill in the blanks with the correct words. (10x10=100p)

Our world relies heavily on fossil fuels like coal, _____ and gas to generate electricity and _____ our daily lives. However, these traditional sources are non-renewable, meaning they will eventually run out. They also release _____ gases that cause severe environmental damage. To _____ our planet, we urgently need alternative energy sources that are _____ and _____. Unlike fossil fuels, _____ options like _____, wind, hydroelectric and geothermal energy come from _____ resources that never run out and do not harm nature. By switching to these _____ alternatives, we can build a cleaner and healthier future.

ANSWER KEY

1. Listen to the paragraph and fill in the blanks with the correct words. (10x10=100p)

Our world relies heavily on fossil fuels like coal, oil and gas to generate electricity and power our daily lives. However, these traditional sources are non-renewable, meaning they will eventually run out. They also release harmful gases that cause severe environmental damage. To protect our planet, we urgently need alternative energy sources that are renewable and eco-friendly. Unlike fossil fuels, sustainable options like solar, wind, hydroelectric, and geothermal energy come from natural resources that never run out and do not harm nature. By switching to these green alternatives, we can build a cleaner and healthier future.
